

# PROJECT DEVELOPMENT PHASE

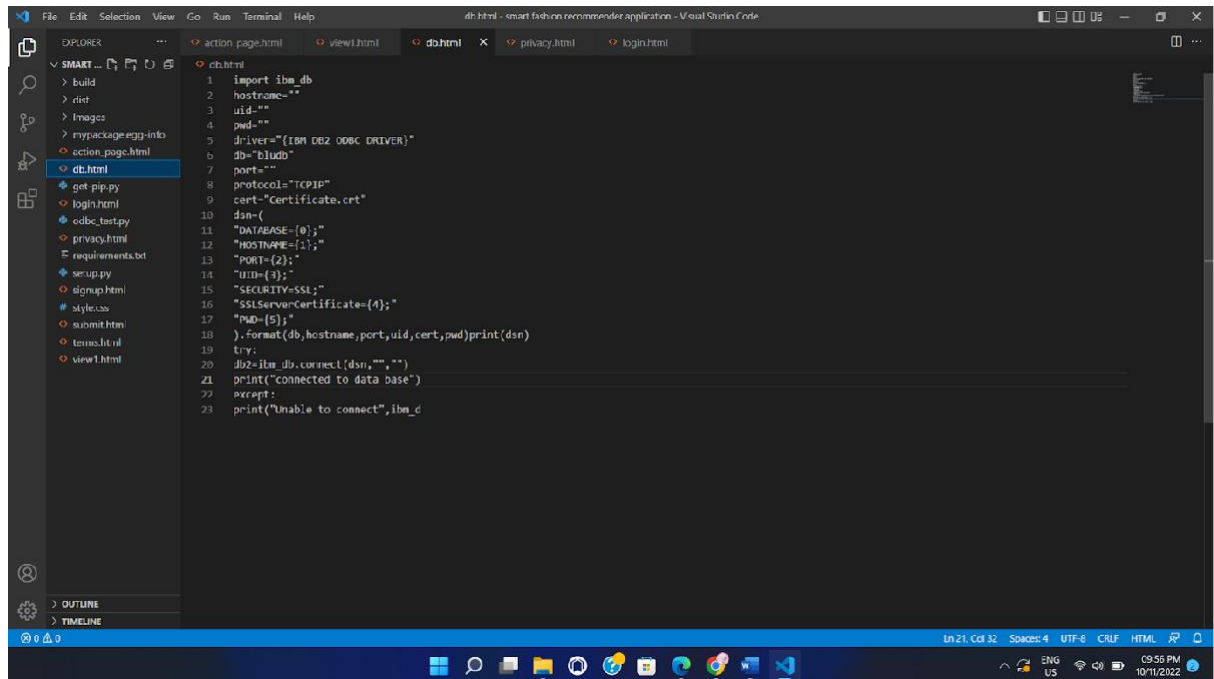

## SPRINT 2

TEAM ID	PNT2022TMID14032
PROJECT NAME	Smart Fashion Recommender Application

### 1. Creating Watson for the application

## 2. Create database connection with python

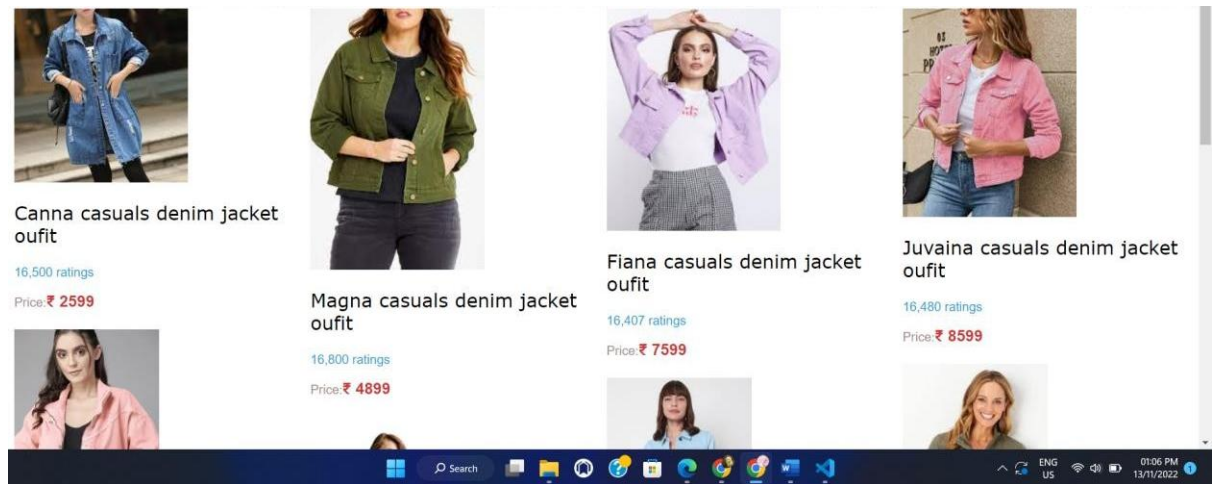

The screenshot shows the Visual Studio Code editor with a Python file named `db.html` open. The file contains a script to connect to a MySQL database using the `mysql.connector` library. The script defines variables for database name, host, port, user ID, password, and SSL certificate, then constructs a DSN and attempts to connect to the database. It prints a success message if connected and an error message if not.

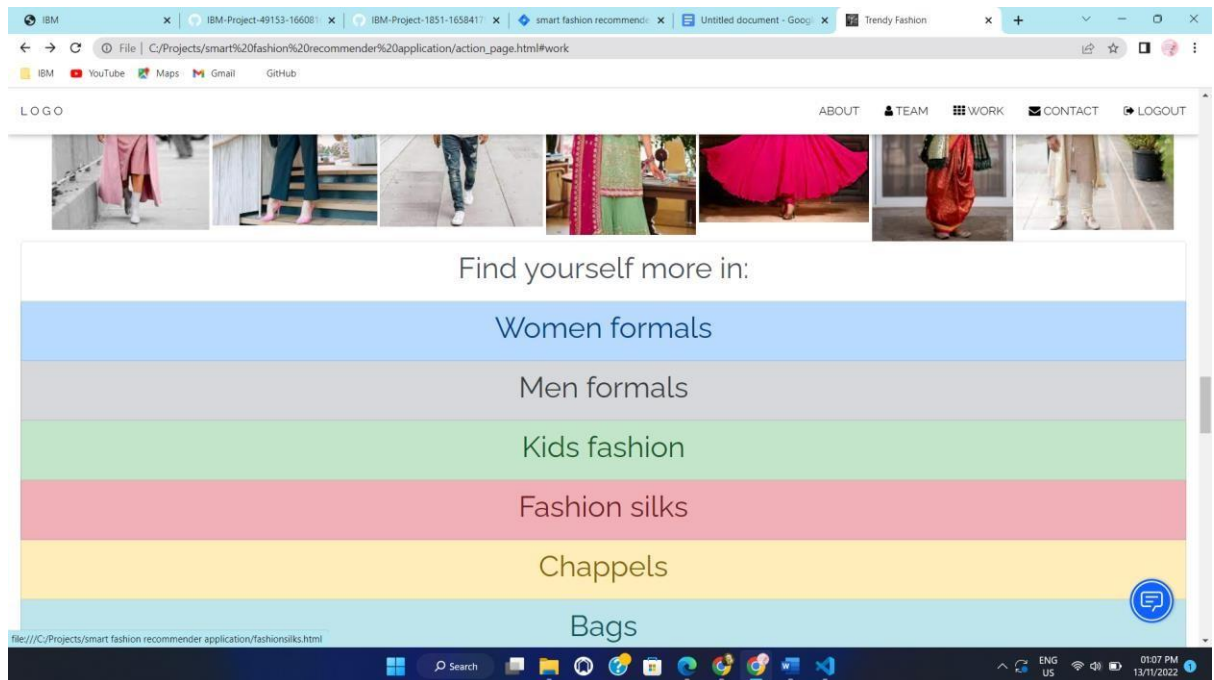

```
1 import mysql.connector
2 hostname=""
3 uid=""
4 pwd=""
5 driver="{IBM DB2 ODBC DRIVER}"
6 db="bludb"
7 port=""
8 protocol="TCP/IP"
9 cert="Certificate.crt"
10 dsn=(
11     "DATABASE={0};".format(db),
12     "HOSTNAME={1};".format(hostname),
13     "PORT={2};".format(port),
14     "UID={3};".format(uid),
15     "SECURITY=SSL;".format(cert),
16     "SSLServerCertificate={4};".format(cert)
17 )
18 ).format(db,hostname,port,uid,cert,pwd)print(dsn)
19 try:
20     db2=mysql.connector.connect(dsn,uid,pwd)
21     print("connected to data base")
22 except:
23     print("Unable to connect",db2)
```

## 3. Create view pages of more product

#### 4. Create more categories and products page

### Canna Bags

16,500 ratings

Price: ₹ 2599

### Magna Bags

16,800 ratings

Price: ₹ 4899

### Fiana Bags

16,407 ratings

Price: ₹ 7599

### Juvaina Bags

16,480 ratings

Price: ₹ 8599

### Canna chappels

16,500 ratings

Price: ₹ 2599

### Magna chappels

16,800 ratings

Price: ₹ 4899

### Fiana chappels

16,407 ratings

Price: ₹ 7599

### Juvaina chappels

16,480 ratings

Price: ₹ 8599
